Owl Timeclock Intermatic Timer

These electronic time switches provide to-the-minute programming for 7-day or full year load control for reduced energy costs. Flexible load control is enhanced by Astro, Pulse and Interval options as required for outdoor lighting control, bell ringing and after hours temporary override respectively.

A non-volatile memory maintains all programmed switching times for the life of the time switch. A factory installed field replaceable lithium battery maintains accurate time keeping and calendar information for a minimum of 8 years. Transient protection for up to 6,000 volts is provided by the power board. These time switches are housed in a lockable steel NEMA 1 enclosure.
